Sandia Resort and Casino Selects MIOX to Treat Pools and Spas

Award-winning resort upgrades to state-of-the-art on site disinfectant generation system to improve guest experience and alleviate safety concerns

Albuquerque, NM – July 27, 2011 – MIOX Corporation, a leader in safe water disinfection, today announced that it has been selected to install two AE-4 on-site disinfection generators to sanitize the pools, spas and outdoor hot tub at Sandia Resort and Casino. Currently employing a salt system, Sandia Resort and Casino is upgrading to MIOX to further improve the quality of the water, and the consistency of the chemistry.

"Guest safety and satisfaction is our top priority at Sandia," commented Tim Nichols, Resort GM. "After visiting other MIOX aquatics installations, including a new aquatics center at our own Sandia Pueblo, we're confident that generating a mixed oxidant solution on-site, on demand will result in crystal clear water that is completely safe and odor-free."

MIOX cost of operation and ease of maintenance were also instrumental in the decision to switch to MIOX.

MIOX's clean technologies treat water using only salt, water and power to generate safe but powerful disinfectant chemical on site. Creating chemicals on site is safe, cost effective and environmentally responsible, cutting back transportation requirements, reducing carbon emissions and fuel consumption, and eliminating the storage and disposal of chemical containers.
