

## AE™ Specifications

The MIOX AE system is a simplified automatic unit configured for permanent installations requiring between 4 and 8 lbs/day (1.8 – 3.6 kg/day) of mixed oxidants measured as Free Available Chlorine (FAC). Available as a skid-mounted or stand-alone system, the AE is ideal for industrial applications and small rural and remote communities. The system activates based upon a level sensor measuring the volume of oxidant in a storage tank. After connection to water and a power source, the only routine operator service requirements are to load salt into the brine generator.
